

# QSS 20 Final Project Milestone 1

Group name: Person 1 name; Person 2 name; etc

Last updated: April 30, 2024

## 1 Project Option

Note which of the options you're pursuing.

Here's data documentation; delete these except for your chosen project option:

- SIP; medical student training option: [program evaluation surveys](#) (and [general SIP proposal](#))
- SIP; SIRS (START Information Reporting System) option: [data dictionary](#) (and
- COVID-19 Twitter: [0.1% sample](#)
- Felony sentencing option: [data codebook](#), [official website with latest on these data](#)
- Senior Thesis / Individual research option: [Add an explanation.](#)

## 2 Your project's main questions

Write 1 paragraph on the main questions you hope to answer.

## 3 Your project's data sources/relevant fields

Give a 1 paragraph tentative summary of potentially relevant data and fields; you do not need to know the data exhaustively yet; this can just be based on codebook or reading in some sample data/viewing its head.

## 4 Learn from an earlier project on your research topic

Read the report for [the provided example on your project option from Fall 2022](#) (for felony sentencing, read one of the two). [Describe one lesson you take away from their report and one weakness of their approach upon which you will try to improve.](#)

## 5 Your project's anticipated challenges

Conduct a 1 paragraph pre-mortem on challenges your group may face – e.g., measuring something, dealing with missing data, disentangling causality.
